OINK! Build makeshift contraptions from a huge collection of parts and make it to the goal without blowing your vehicle to pieces! IGN's "Best Mobile Game of 2012" Winner! "Extremely fun and very challenging" -- Kotaku "The best title Rovio has released yet" - IGN "4/4 - Must Have" -- Slide to Play "If you can't enjoy watching a pig drive a badly constructed car off a cliff and onto a pile of dynamite, you probably don't have a soul." - Yahoo/BGR Create the ultimate flying/crawling/rolling/spinning/crashing device and pilot the pigs safely to the eggs! The Bad Piggies are after the eggs again -- but as usual, nothing is going according to plan! Can you create the ultimate flying machine and steer them safely to their destination? Those tricky pigs have a few objects they can use, but they need your help to turn these into the perfect transportation! With more than 200 levels, and free updates coming up, you have hours and hours of pig-crashing, exploding, and flying fun! Get three stars to unlock over 40 more levels! HINT: Sometimes you need to play the level several times to achieve all the objectives - try building a new device or steering in a different way to earn all the stars! Features:
● Over 200 levels crammed with flying/driving/crashing fun!
● 40+ special levels unlocked by getting three stars!
● Free updates!
● 5+ sandbox levels to stretch your creativity!
● Ultra-special, ultra-secret, ultra-difficult sandbox level to unlock by collecting ten skulls! Oh - guess it's not a secret anymore...
● 42 objects to create the ultimate machine: motors, wings, fans, bottle rockets, umbrellas, balloons, and much more!
● Mechanic Pig
● Need help? This little piggy will build the "Cake Race" and the sandbox free roam place that you need money to pay for (it's called sandbox of dreams I think). The "Sandbox of Dreams" is where you can build any possible machine you want as what if, the Cake Race is an online competitive mode. So basically, you have to get as much cakes as you can in a matter of time. The cakes give you points which whoever with the most points wins. Winning gives you crates which crates give you items to customize also. Another way to get crates are to find them in levels daily. If you don't want to grind a lot for crates then grind for bolts, you can trade 80 each for a randomized customized item. The levels and the other sandboxes can be hard and a pain but sometimes can be fun. If you didn't know, this is a puzzle game that can give your brain a challenge. Don't worry because you can use coins for power ups and hints. Why don't you give this game a try? The road to el porkado is entirely useless since most levels have bridges, and every bridge gets stuck inside a wall and phases in and out of existence so that some levels are impassable, the amount of cake you get to feed the pig king is far too much, reaching 150 without even trying, and you have to slowly feed it one by one for such little tiny reward. The only way to sort of unleash your creativity isn't actually sandbox mode, which feels somewhat mislabeled, but is actually their \$3 field of dreams DLC. And the daily crate system constantly puts them in the el porkado levels, and the crates often give you a pitiful amount of reward, even the gold crate only gave 32 bolts/nuts, 2/3 parts were ones I already had, and just a couple of power ups. The ads are incessant and the only way to keep up with their coin currency is to constantly watch ads for gem, but then most of the time if you instead just repeat the same level or progress it still plays an ad for you without reward. It feels entirely arbitrary. After playing the game when it came out, and coming back to it two years later, I feel it's gotten worse. More features don't equate to a better game. Time just flies by while playing this, but instead of leaving you entertained, at a certain point in the game it just drives you crazy. TLDR: Amazing at killing time, and driving you crazy. For other uses, see Bad Piggies. Bad Piggies is a video game made developed and published by Rovio Entertainment released in 2012 for mobile devices and PC. It is a spin-off of the Angry Birds series. In Bad Piggies, the player follows the imagination of Ross, a pig with freckles, whose hobbies are constructing both land and air-based vehicles, transporting him. History Promotion On August 27, 2012, the Bad Piggies made their own Facebook and Twitter accounts and started teasing the readers that they have plans to soon reveal something. On August 30, Rovio posted a video on their YouTube featuring Red on a featureless white background, with pigs falling on top of him and the supertitle "Something PIG is coming" appearing on the screen. After eight days of secrecy, on September 4, Rovio unveiled it: a new game in which the pigs are the stars. On September 17, Yahoo! Games has revealed the gameplay for the game. The main point is that the player builds vehicles (cars, planes, etc.) out of various materials (wood, metal, etc.) and puts Ross to ride them and tries to collect things such as stars. The following day, the TV show X-Play made a preview of the game showing more of the game. On September 27, the game was released on iOS, Android, and Macintosh, with PC releasing later the same day. Bad Piggies is free on Google Play, is \$2.99 for iPad (HD) and \$0.99 for iPhone though it later became free on iPad and iPhone. Updates Toons.TV was added to the game during the Halloween update. Features in the game it just drives you crazy, TLDR: Amazing at killing time, and driving you crazy. For other uses, see Bad Piggies. Bad Piggies is a puzzle game similar to Amazing Alex, where the player needs to build a vehicle with a limited set of parts they are granted. The player has a "board" where they will be able to assemble the parts. The main objective of Bad Piggies is to build a vehicle to take Ross to the goal of the level. If the player fails to get to the goal, they can always restart to return to the starting point of the level, where they will be able to test the vehicle again or create a new one. Finishing the level will grant the player a certain amount of stars, which will depend on their process and vehicle. To get stars, the player may have to do some tasks such as getting star boxes, not using a specific parts, etc. Physics apply to the vehicle (weight, force, and aerodynamics) which the player may compensate or use to benefit the chances of getting to the goal, whilst operating the various parts to get to it. For example, lighter parts like wood will be light in weight, though the material itself will be very vulnerable to crashes. Likewise, heavier parts will be heavier in weight, though they will also be less prone to damage. Objects Characters Playable characters King Pig Ross (first appearance) Non-playable characters Episodes Other modes Shop The shop is where the player can buy power-ups, Loot Boxes and Snout Coins. Dessert Mode Main article: Dessert Mode Dessert Mode is an extra mode where the player needs to feed King Pig with cakes they find throughout the game. After eating some food, King Pig will burp and, sometimes, grant the player a random item. Cake Race Main article: Cake Race Cake Race is an extra mode where the player competes against another player in a random map. There, both opponents have to build a vehicle to collect five cakes to get enough points and win. The amount of points the player is granted after collecting a cake depends on their level and whether or not they collected it first. The player who gets the most amount of points is the winner, regardless of whether they collected all five cakes or not. Comic adaptation Main article: Bad Piggies Comic In promotion of the game, there was a web comic released by Rovio in the Bad Piggies website. In it, Ross tries to build a boogie, only for it to be destroyed. However, Foreman Pig comes in and helps him build an even better vehicle. Bad Piggies for Windows Phone An Xbox-supported Windows Phone port of Bad Piggies. Bad Piggies (Talkweb) A Talkweb version of Bad Piggies released only in China. The Sequel Main article: Bad Piggies 2 Slide 3 of the November 2021 page for the Toons version of Bad Piggies 2. Bad Piggies 2 is an upcoming game in the Angry Birds franchise and the sequel to Bad Piggies. The game was announced through ads on TikTok during mid 2021, which led to a GeekLab page emulating the Google Play Store, and a survey asking the viewer questions about the game, most notably what art style the game should use: the art style used in the first Bad Piggies, the art style of Angry Birds Toons, and an art style similar to the one used in the Angry Birds films and media related to them. The game is currently being developed in the Stockholm studio located in Sweden. Trivia This is the third game in the Angry Birds series to feature the pigs' new design since the first version, the first being Angry Birds Chrome and the second being Angry Birds Space. This is also the only game still up to use the Chrome design for the pigs and birds instead of the designs from Angry Birds Friends or Toons. There are three versions of the Bad Piggies theme. The first version is the piano version which has the piano playing the main theme. Ross can also be heard laughing. This played in the title screen before the 1.5 update. The second version replaced the piano with a banjo and starts much later than the other two versions. Ross is no longer heard in the song. This played in most levels before the 1.5 update. This was likely a beta version that was left in by accident, supported by the fact that it's name in the game files is "action test 1". The third version replaced the last two in the 1.5 update and is much shorter cutting off right before the part where the vehicle horn sounds are heard. This version still has the banjo from the second version but starts at the same time the piano version started. Ross is once again absent from the whole song. According to Rovio, Ross has a real name, however, they said that one "would not be able to pronounce it".[citation needed] This is the first game to have the birds as the main antagonists. Leonard and his consort appear in Dessert Mode as portraits beside King Pig's throne, in the Pig Palace. This game, Agri Birds and Flip the Bird are the only Angry Birds games not to have the words Angry Birds in its title. This is also the only spin-off game to not have the word Bird in its title. The site badpiggies.com was a pig adoption site in 2011. This is the earliest Angry Birds game to not currently be removed or discontinued, meaning it's still up on the App Store. It used to be though, as in 2019, it got removed along with the rest of the Angry Birds games before Angry Birds Transformers. However, the game came back in early 2020. The old "HD" text in a blue circle from the old HD version app icon still appears in the main menu of the HD version. The birds don't have their regular voices and instead have Matilda's voice even though she doesn't appear at all in this game.
